David Garlock is a wonderful facilitator.
Very patient in explaining concepts.
Clear about what to expect from class. Able to explain concepts well, and showed confidence when delivering module content.
Organized course materials. Perfect pace in class with sufficient explanation.
At times material was presented a little quickly to allow us to follow the demos and also keep enough notes to allow us to be able to reproduce the results outside of class.
Head and shoulders a better facilitator with both a good clear understanding of the material and a well thought out way to approach it. Please make this man the only Facilitator for Java Class time.
Overall this section was easier to teach. Also as the concepts began to sink in students were more receptive. An overall good style of teaching or should I say facilitating
Awesome facilitator. Presents the material well. Even though Java is hard to learn, he presents the material very well. Presentation of the material is awesome.
Dave has a natural teaching ability. Speaking for all of us, we prefer having someone like Dave teach the whole module.
Only if and could Dave Garlock facilitate the entire Java module starting from the very beginning, there wouldn't be so much complaints and Yes this Dave makes a world of difference comparing to the other Dave's facilitating style!
David is a good facilitator because he has a good classroom presence. He is able to "read" the class. He is patient and goes at a good pace.
Dave is good teacher and that is what we need. He might not have a comprehensive technical background but he conveys the message well. I would like to see him the full time class facilitator
Very focused, providing clear explanations on the subject.

Excellent facilitators. Should take the role of Java class facilitators through all concepts!
Dave's only flaw in team time was too many people needed him too much. He didn't have enough time.
Came in and used the white board to give us new ideas and clear up issues. Completed what was taught in class.
good job
